### **Aims and Scope**

The multidisciplinary journal *Cellular and Molecular Life Sciences (CMLS)* publishes research articles, short original papers, minireviews, reviews and multi-author reviews covering the latest results in biological and biomedical research. The journal will consider contributions focusing on molecular and cellular aspects of biomedicine, cell biology, immunology, molecular genetics, neuroscience, biochemistry, pharmacology and physiology related to pharmacology. In addition, *CMLS* welcomes comments on any article published in *CMLS*.
